

WHATEVER YOU WANT IT TO BE

"Have you ever thought why you should be restricted to using one-coloured-panels all the time? Wasn't there this project where you wanted a specific pattern to be visible across the facade? Why should you accept the limitation of traditional colour application technologies? The time has come for you to design the facade and not have to select it. The ultimate creativity toolset- look no further."

NOT ONLY COLOURS, BUT ALSO EXCLUSIVE FINISHES

"There is this idea in your mind about a building that has a very strong character and message to send. But what to dress it in?"

Spectra & Sparkling Colours: What if you created a building that looks different to every single person looking at it even at the same point in time? Chameleons would want that!

Natural: This is not a colour, this is the real thing. Raw Aluminium at its best.

Anodized Look: Isn't the world too glossy and shiny already? This series will give you a very matt metallic look.

Urban: Extremely muted and matt surface to complement the high glossy environs of a typical urban setting.

Organics Elegance: Showcases the very essence of nature's artistry. It is a tribute to the subtlety of organic beauty, where even the most unassuming shades unveil a world of grace and elegance.

Colourscapes: Step into the world of vibrant hues and dazzling shades, where absolutely breathtaking colours are at your fingertips.

Concrete: Most breathtaking contemporary concrete shades that will embellish your creations.

Grove: Best wood finishes to make your structures stand out from the rest.

Boundless possibilities.

YOUR FAVOURITES

"These are your most favourite colours. You have been choosing them over and over again. And millions of square metres installed are meeting millions of people each day."

Metallic colors offer a tantalizing array of captivating visual effects that transform under varying lighting conditions and viewing angles, elevating your building to new heights of brilliance and radiance. Solid colors exude a refined and subtle elegance, imbuing your building with a sense of timelessness and sophistication.

METALLIC COLOURS

ADD SOME SPICE

Vibrant colors can be used to craft a unique appearance that evokes a range of emotions and reactions. Imagine the daring and audacious effect of Lemon, the electrifying and vibrant display of Red or the mesmerizing and enchanting allure of Intense Blue.

VIBRANT COLOURS

WE'LL DO IT FOR YOU

Are you still searching for that elusive color that perfectly captures your vision? Look no further than our services. We take immense pride in our ability to match any color, even if it is not currently featured in our color charts.

Our ultimate goal is to bring your unique vision to life, and we will stop at nothing to make that a reality. Whether you're seeking a bold and vibrant hue, or a subtle and nuanced shade, our team of experts will use their unmatched skill and expertise to match your precise specifications.

Trust us to bring your vision to life, and experience the unparalleled satisfaction that comes with seeing your vision come to fruition.

SOLID COLOURS

SPECIAL CATEGORY

GENERAL INFORMATION

ALUCORE® features a multi-coat, multi-bake process on a continuous coil coating line using the highest grade of PVDF/FEVE paint system. The multiple layers are individually cured at temperatures of between 200-260 °C. The quality of the coating is tested according to standards established by E.C.C.A. (European Coil Coating Association) of which 3A Composites is a member. Fluorocarbon (PVDF) coating systems combine good formability and excellent surface durability. They are extremely resistant to weathering, strong solar radiation and pollution. The colour reproduction in this chart is subject to printing limitations. For exact colour matching, request actual colour samples.

The standard gloss for colours is between 30% - 40% according to Gardner Scale.

Minimum order quantities apply. For more information please refer to your nearest ALUCORE® representative or visit www.alucobond.in

ONLY FOR METALLIC COLOURS

To avoid possible reflection variations, it is recommended to install the panels in the same direction as marked on the protective peel-off-foil. Colour variations may occur between panels originating from different production batches. To ensure colour consistency, the total requirement for a project must be placed in one order.
